

Counting Change Tips

- Find out **how much** change you need.
- If you have **more than one** kind of coin, find the coin that's worth the **most**. Take one and ask yourself, is this the **right amount**?
- If you don't have enough, take another coin. Ask yourself, how much are these coins worth **together**? Is this **enough**?
- If you have **too much**, take a coin that's worth **less** than the first one. Ask yourself, how much are these coins worth **together**? Is this the right amount?
- If you don't have the right amount yet, take another coin. Keep adding coins until you have **exactly** the right amount. Now you have exact change.

= 25 cents

quarter

= 10 cents

dime

= 5 cents

nickel

= 1 cent

penny
