

# Fire Plan Tips

## To create a fire escape plan, you should:

- Draw the **layout** of each floor of your house. Each floor needs its own plan.
- Mark the location of all the **doors, windows, and smoke detectors** on your drawing.
- Mark **two different ways** you could get out of each room in case of a fire.
- Choose a place **outside** of the house for your family to **meet** in case of a fire.
- Go over the fire escape plan with your **whole** family. Then **display** the escape plan where everyone can see it.

## Symbols you may see on a fire escape plan:

\*  = doors

\*  = windows

\*  = smoke detectors
