

Introducing iLearnabout digital conservation education resources

iLearnabout plans to build a range of digital resources to support after-school clubs and conservation initiatives. Teachers and learners will be supported by the on-line, iLearnabout conservation club. The resources will be structured into a topic framework which is being developed in consultation with clubs and organisations. This framework is under review.

iLearnabout Topics

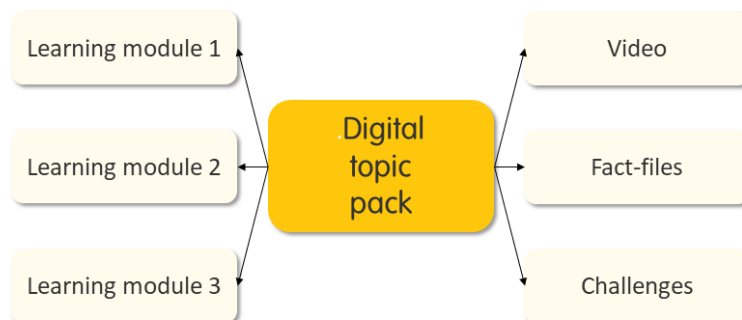

Each topic will consist of a variety of resources, all available in digital format. We are calling these **digital topic packs**. Organisations can choose the topic pack(s) they want and download them free to use offline. There is no need to use topics in a particular order or to use all of the topics.

Digital topic packs will contain:

- Video ‘scene-setter: introducing the topic
- Learning modules: up to three interactive digital lessons which include audio, illustrations, animations, quizzes and short activities
- Fact-files: supporting further research
- Challenges: guides to carrying out longer projects relevant to the topic. This is a chance for children to choose from a range of projects and put what they have learnt into action locally.

Awareness – Understanding - Action

iLearnabout

an  **iAfrica** project
foundation

So which materials have you sent for us to look at?

1. We have made **two interactive learning modules** as examples. They come from different topics.

The learning modules are accessed online at the moment (the final versions will be available to download). Please use these links to view them:

- Humans and wildlife module 1: What do wild animals need? <http://tiny.cc/wild-animal-needs>
- Biodiversity module 1: Importance of biodiversity <http://tiny.cc/importanceofbiodiversity>

2. We have also attached some examples of topic pack resources with this email. You will find examples of **challenges and fact files** from different topics.

Feedback

We hope you enjoy the resources and we look forward to your comments. The material is being designed with you in mind so it is important that it suits your needs. We are very interested in your feedback. If you have time, please let us know what you think by:

- Arranging a call so we can talk through and share ideas
or
- Completing the attached feedback form and returning it by email

Questions?

We have attached a frequently asked questions (FAQs) document with this email which you may find helpful. You will also see some guidance there on how to use the learning modules.

Please let us know if you have difficulties accessing materials or want to talk through any queries.

Contact

Please contact us via email and we can arrange to skype or zoom.
